

B3019 **LIBERTY LINK**

One of the top performing hybrids in the Brevant® seeds lineup that can achieve exceptional yields across diverse geographies.

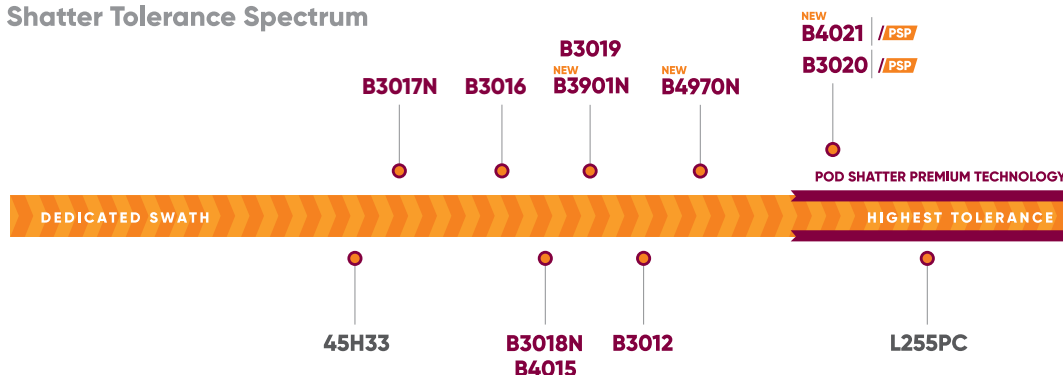

B3019 is one of the highest yielding hybrids in the Brevant® seeds lineup. It is protected by seedling and adult resistance to Blackleg and a CR6+ Clubroot package that controls all major pathotypes of concern in Western Canada, making it an excellent option for a grower in any region.

2024 Corteva Agriscience IMPACT Trials	
B3019	108%
CS4000 LL	100%
81 locations, 69% WINS	
B3019	99%
InVigor® L343PC	100%
81 locations, 44% WINS	
2 year (2023-2024) yield summarized from IMPACT™ and field scale trials across Western Canada as of Nov 7, 2024.	

Product Attributes	
Maturity	Mid-maturity; Slightly later than B3016
Clubroot	CR6+ (4+,5) - 2F, 3H, 5I, 6M, 8N, 3A, 3D, 8E, 5X, 2B, 8E, 11A, 9C, and 9E CR6+ - Shows a higher level of Clubroot trait expression.
Blackleg	R- Adult Plant Resistance
Verticillium Stripe	5
Early Growth	Very good early growth
Lodging	Very good resistance
Plant Height	Tall

Pod Shatter Premium Technology // PSP

Shatter Tolerance Spectrum

Protected by Lumiderm™ insecticide seed treatment and Lumiscend™ fungicide seed treatment, as part of the LumiGEN seed treatment package.
